Middle East Technical University, 2005–2008

BA. in English Language and Literature
Bilkent University, 2000–2005

</> WORK EXPERIENCE

Software Developer

April 2014 – November 2018

Seckin Publishing Inc.

Main developer for jurix.com.tr which is the leading academic law journal database in Turkey which serves thousands of law firms and numerous university libraries.

The project is a subscription based academic journal database which offers advanced indexing and searching of articles and content. The system is built with Laravel and it uses Vue.js and jQuery on the frontend. It also relies on other technologies such as Redis for queueing and cache, socket.io for event based communication, Elasticsearch for full-text indexing, searching and aggregations among others.

Subscription management is built from scratch including banking integrations for recurring credit card payments as well as the WordML and IDML parsers for importing content.

Project Manager, Software Developer

April 2013 – April 2017

YD Software

Project management and software development on a range of backend and frontend systems for the Union of Chambers of Certified Public Accountants and Sworn-in Certified Public Accountants of Turkey, including e-learning, online examination and certification.
